

**THE CLASS
OF
1987**

SUMMARY PAGE FROM GRADUATE REPORT ON THE CLASS OF 1987

The summary material which is contained in this report reflects the responses of 64.4% of the graduating class of 1987. This includes students who graduated from December 1986 through August 1987. A total of 280 graduates of a class of 460 have volunteered information concerning employment, salary and current graduate education.

The first of two mailings was sent to graduates who were instructed to return the form when they obtained their diplomas from the registrar's office. Those who preferred that their diplomas be sent to them were asked to return the form by mail. A second mailing was sent in November to students who had not returned the first questionnaire or who had reported that they were still seeking employment at the time of the first mailing. Therefore, the information in this report is, essentially, a 6-month follow-up of the Class of 1987.

In addition to the average salaries for graduates by academic major which appears on the following page, other notable points of interest include:

17.9% of the graduates who completed the questionnaire are attending or plan to attend graduate school in the near future. This is exactly the same percentage that reported similar intentions in 1986.

62.9% are employed in positions related to their academic majors or career objectives, compared to 58.2% in 1986.

10.7% were unemployed and looking for work as of November 1987. 18.6% were recorded in this category one year ago.

12.1% were underemployed (i.e. working in a field unrelated to their career goals.) This figure was 13.7% in 1986.

Of the graduates who are employed, 22.5% indicate that their initial employment was the result of direct application to the employer. 17.1% received their initial job lead from either the University Placement Office, a faculty member or as the result of a co-op assignment or internship. The rest received the key referral from family or friends (15.7%), by answering a classified ad (5.7%) or through an employment agency (2.1%).

Graduates who secured a new position as a result of completing their degree received an average starting salary of \$16,089, up from \$15,911 in 1986.

For the first time, graduates were asked to report which of the services offered by the Placement Office they had utilized while undergraduates. The results are as follows:

Part-time Placement	17.5%	Resume/Interview Asst.	17.5%
Graduate Placement	45.4%	Job / Career Counseling	16.4%
Co-op / Internships	12.1%	Career Library	12.9%

26.8% report that they had used none of the above services.
