EXECUTIVE SUMMARY

The summary material contained in this report reflects the responses of 67.2% of the graduating class of 1992. Included are students who graduated from December 1991 through August 1992. 535 graduates of a class of 796 have volunteered information concerning employment, salary and plans for further education.

The first of two mailings was sent to graduates in June 1992. A second mailing was sent in November to those who had not returned the first questionnaire or who had reported that they were still seeking employment at the time of the first mailing. Therefore, the information in this report is, essentially, a 6-month follow-up of the Class of 1992.

In addition to average and median salary information for graduates by academic major (pages iv and v), other points of interest include the following:

EMPLOYMENT RATES:

- A. 494, or 92.3% of the graduates are actually in the job market. Of the remaining 7.7%, 8 persons (1.5% of the total) are unemployed by choice. The remainder are pursuing additional degrees.
- B. 67.2% of the above 494 graduates have secured new positions as a result of their degree; 27.1% are employed in the same position that they held prior to graduation. The remaining 5.7% are unemployed.
- C. An equally important issue, however, is the number of graduates who are employed "in their field."
 1. Overall, 82.0% of the 91-92 graduates in the job market (those employed, plus those currently seeking employment) are employed in positions related to their academic majors or career objectives. In light of the national economy, this number compares favorably to 74.5% in 1991 and 81.6% in 1990.

The decision was made to classify education majors who are employed as substitute teachers as graduates working "in their field".

2. 12.3% are underemployed (i.e. working in a field unrelated to their career goals.) This figure was 14.2% in 1991.
3. 5.7% are unemployed and looking for work. The latter figure compares to 6.0% in this category one year ago.

CONTINUED EDUCATION:

- A. 11.6% of the bachelor's degree recipients who completed the questionnaire were attending or planned to attend graduate school within a year of graduation. Although it is impossible to be sure, the sharp decrease from the 16.8% reporting similar intentions in 1991 may be attributable to a change in the wording of the question. Prior questionnaires only asked if a graduate "planned to attend graduate school."

Business	3%	Liberal Arts	20%	Science/Tech	30%
Educ/Human Serv	6%	Nursing/Hlth Prof	13%		

- B. Among recipients of associate degrees, 34.1% are currently completing requirements for a baccalaureate degree.
- C. The number of bachelor's degree recipients who are pursuing additional undergraduate classes has nearly tripled since one year ago (5% in 1991-92 vs. 1.7% in 1990-91).

JOB SEARCH STRATEGIES

- A. Of the graduates who are employed and reported the source of the lead which resulted in their initial employment following graduation, 20.8% indicate that employment was the result of direct application to the employer. 14.4% received their initial job lead from either the Placement Office, a faculty member or as the result of a co-op assignment or internship. The rest received the key referral from family or friends (13.1%), by answering a classified ad (10.1%) or through an employment agency (.6%).
- B. 131 graduates have remained in the same positions that they held prior to receiving their degrees, while an additional 28 persons have remained with the same employer but have accepted new positions following their graduation.

SALARY STATISTICS (Continued on pp. iv-v):

- A. Baccalaureate degree graduates who secured a new position as a result of completing their degree received an average starting salary of \$19,312, less than a 1% increase over the average starting salary of \$19,186 in 1991. Associate degree recipients, most of whom graduated from the School of Nursing and Health Professions, averaged \$23,278.
- B. Individuals seeking salary information regarding Master's degree recipients should refer to the tables on pp iv-v.

PLACEMENT OFFICE USAGE:

- A. Graduates were asked to report which services offered by the Career Services & Placement Office they had utilized as undergraduates.

Part-time Placement	18.5%	Resume/Interview Asst.	25.2%
Graduate Placement	43.6%	Job / Career Counseling	15.5%
Co-op / Internships	12.1%	Career Resource Center	28.2%

- B. At some time during their tenure at USI, 63.6% of the graduates report using one or more of the services offered by Career Services & Placement. Among bachelor's degree recipients, usage by students in the School of Business is highest (90.0%), followed by the School of Education & Human Services (74.4%), the School of Liberal Arts (71.6%), and the School of Science and Engineering Technology (57.5%). Among all graduates from the School of Nursing & Health Professions, only 14.8% utilized these services. We are hopeful to more adequately meet the needs of these students when the Health Professions Building is completed, allowing them to participate fully in campus life.
