EXECUTIVE SUMMARY

The summary material contained in this report reflects the responses of 61.6% of the graduating class of 1993. Included are students who graduated from December 1992 through August 1993. 481 graduates of a class of 781 have volunteered information concerning employment, salary and plans for further education.

The first of two mailings was sent to graduates in June 1993. A second mailing was sent in November to those who had not returned the first questionnaire or who had reported that they were still seeking employment at the time of the first mailing. Therefore, the information in this report is, essentially, a 6-month follow-up of the Class of 1993.

In addition to average and median salary information for graduates by academic major (pages iv and v), other points of interest include the following:

EMPLOYMENT RATES:

- A. 432, or 89.8% of the graduates who responded are actually in the job market. Of the remaining 10.2%, 8 persons (1.7% of the total) are unemployed by choice. The remainder are pursuing additional degrees.
- B. 65.3% of the above 432 graduates have secured new positions as a result of their degree; 27.3% are employed in the same position that they held prior to graduation. 8 individuals did not indicate the status of their employment. The remaining 5.6% are unemployed.
- C. An equally important issue, however, is the number of graduates who are employed "in their field."
 1. Overall, 83.1% of the 92-93 graduates in the job market (those employed, plus those currently seeking employment) are employed in positions related to their academic majors or career objectives. In light of the national economy, this number compares favorably to 82% in 1992 and 74.5% in 1991.

The decision was made to classify education majors who are employed as substitute teachers as graduates working "in their field".
 2. 11.3% are underemployed (i.e. working in a field unrelated to their career goals.) This figure was 12.3% one year ago.
 3. 5.6% are unemployed and looking for work, compared to 5.7% in 1992.

CONTINUED EDUCATION:

- A. 13.4% of the bachelor's degree recipients who completed the questionnaire were attending or planned to attend graduate school within a year of graduation, up from 11.6% one year ago.

Business	3%	Liberal Arts	12%	Science/Tech	46%
Educ/Human Serv	16%	Nursing/Hlth Prof	10%		
- B. Among recipients of associate degrees, 36.6% are currently completing requirements for a baccalaureate degree.

- C. The number of bachelor's degree recipients who are pursuing additional undergraduate classes has increased dramatically in the last two years. In 1991 the percentage was only 1.7%. The figure in 1993 is 7%.

JOB SEARCH STRATEGIES

- A. Of the graduates who are employed and reported the source of the lead which resulted in their initial employment following graduation, 19.6% indicate that employment was the result of direct application to the employer. 18.4% received their initial job lead from either the Placement Office, a faculty member or as the result of a co-op assignment or internship. The rest received the key referral from family or friends (16.2%), by answering a classified ad (4.4%) or through an employment agency (2%).
- B. 24.8% of the graduates securing new positions received promotions with their current employer.

SALARY STATISTICS (Continued on pp. iv-v):

- A. Baccalaureate degree graduates who secured a new position as a result of completing their degree received an average starting salary of \$20,121, a 4% increase over the average starting salary of \$19,312 in 1992. The previous year, salaries had increased less than 1%. Associate degree recipients, most of whom graduated from the School of Nursing and Health Professions, averaged \$22,967, down slightly from last year's average of \$23,278.
- B. Individuals seeking salary information regarding Master's degree recipients should refer to the tables on pp iv-v.

PLACEMENT OFFICE USAGE:

- A. Graduates were asked to report which services offered by the Career Services & Placement Office they had utilized as undergraduates.

Part-time Placement	19.3%	Resume/Interview Asst.	25.8%
Graduate Placement	48.2%	Job / Career Counseling	15.4%
Co-op / Internships	19.0%	Career Resource Center	30.5%

- B. At some time during their tenure at USI, 75.9% of the graduates report using one or more of the services offered by Career Services & Placement. Among bachelor's degree recipients, usage by students in the School of Business is highest (87.2%), followed by the School of Education & Human Services (82.6%), the School of Science and Engineering Technology (77.1%), and the School of Liberal Arts (75.8%).

Although only 26.2% of the graduates from the School of Nursing & Health Professions utilized these services, that number has nearly doubled since 1992. We speculate that the completion of the Health Professions Building (allowing those students to more fully participate in campus life) and a tightening job market in health-related careers will cause increasing numbers of NHP students to seek career and job-related services.
