- 91.7 percent of the respondents are employed or actively seeking employment. The remaining 8.3 percent are either enrolled in additional academic coursework or have chosen not to seek employment at this time.
- 18.1 percent of the bachelor's degree recipients are enrolled in graduate or professional school. This number, plus the number employed or actively seeking employment, will exceed 100 percent because many new graduates are employed while also pursuing graduate school coursework.

- Among bachelor degree recipients who are employed, 90.9 percent are working "in their field or in a field in which they expressed satisfaction", a slight increase from 88.3 percent in

2005. (Education majors employed as substitute teachers are coded as working "in their field".) Among ALL graduates employed, 90.45 percent are working in their field of study (2005 figure = 91 percent). Overall, these numbers have not changed significantly in the past two years.

 - 14.2 percent of the employed bachelor degree recipients left the tri-state area in 2006, a ten percent decrease from 2005 (24.2 percent).
 - 25.8 percent of the employed master degree recipients left the tri-state area in 2006, a 1.4 percent increase from 2005 (24.4 percent).
