

Class of 1996

THE CLASS OF 1996

PROFILE FROM THE OFFICE OF THE REGISTRAR

The Office of the Registrar reports the following salient findings regarding the Class of 1996. Awareness of this demographic information may provide a useful background for other data contained in this report.

- 957 degrees and certificates were awarded to 946 individuals between December 1995 and August 1996.
- Baccalaureate degrees were awarded to 686 graduates of which 534 were bachelor of science, 76 were bachelor of arts, 27 were bachelor of social work, 47 were bachelor of science in nursing and 2 received a bachelor's degree in occupational and general studies.
- 31.1% of the graduates were 30 years of age or older.
- 96.5% of the graduates identified themselves as white, non-Hispanic ethnic origin. 2.8% of the graduates classified themselves as minorities and .7% as non-resident aliens.
- Almost 7 of every 10 graduates (67.9%) were female.
- 62.7% of the degrees were received by graduates from Gibson, Posey, Vanderburgh and Warrick Counties. 16.3% of degree recipients were from other area counties. Graduates from all other Indiana counties represented 10.5% of the graduating class; 10% of the degree recipients were from other states; .8% were from other countries.
- The School of Nursing and Health Professions awarded over three-fifths (63.4%) of the associate degrees and the School of Business awarded almost a fourth (22.2%).
- 35.8% of the baccalaureate degrees were awarded by the School of Liberal Arts, followed by the School of Business (23.5%), the School of Education and Human Services (19%), the School of Nursing and Health Professions (12.4%), and the School of Science and Engineering Technology (9.3%).

This report was compiled by the Career Services & Placement Office
The University of Southern Indiana
March 1997

Career Services is indebted to and appreciative of the assistance provided by John Deem and John Baburnich in the Registrar's Office and to the Media Services staff for their assistance in developing the graphics contained in this report.

EXECUTIVE SUMMARY

This report is a six-month follow-up of the 1996 graduating class; responses were received from 68.1% of the graduates.

EMPLOYMENT RATES

- 94.1% of the respondents are actually in the job market. Of the remaining 8.6%, 13 persons are unemployed by choice. The remainder are pursuing additional degrees.
- Of the graduates in the job market, 69.4% have secured new positions as a result of their degree; 29.3% are employed in the same position that they held prior to graduation. Seven individuals did not indicate the status of their employment.
- Among bachelor's degree recipients who are employed, 85.7% are employed "in their field" (up from 84.8% in 1995). Among ALL graduates, 88.7% of those in the job market are employed in their field of study. (Education majors employed as substitute teachers are included in the number of graduates working "in the field".)
- Among bachelor's degree recipients, technical majors report the highest degree of related employment, including Engineering Technology (100%), Computer Information Systems (100%), Accounting (100%), and Health Professions (95%). This is consistent with national trends indicating higher-than-average job growth in the computer and health care fields.
- 10.7% of all graduates are underemployed (i.e. working in a field unrelated to their career goals.) This figure is exactly the same as that reported one year ago.
- 4.4% of bachelor's degree recipients are unemployed and looking for work, the same figure reported in 1995. The unemployment rate has increased among associate's degree recipients from 2% in 1995 to 8.4% in 1996.

CONTINUED EDUCATION

- 9.6% of the bachelor's degree recipients who completed the questionnaire were attending graduate school within a year of graduation, down from 11.5% in 1995.
- 47.5% of the associate's degree recipients are currently completing requirements for a baccalaureate degree.
- 4.8% of the bachelor's degree recipients are enrolled in additional undergraduate classes, considerably fewer than the 7.3% reported in 1995.

GEOGRAPHICAL LOCATION

- 82.7% of the graduates accepted employment in the tri-state, down from 85.8% in 1995. Bachelor's degree recipients were most likely to relocate (19.5%), followed by Associate's degree recipients (12.5%) and those receiving Master's degrees (11%).
- 88.2% of the graduates remained in the state of Indiana. 9 others (1.4%) live outside the state but work in Indiana communities.

JOB SEARCH STRATEGIES

- 34.2% of all working graduates report that they remained employed with the same firm they were working for prior to graduation (master's degree recipients = 50%; bachelor's degree recipients = 26%; associate degree recipients = 48.3%).
- Of the remaining 65.8%, 26.5% secured positions through direct application to the employer; 29.8% through the University (including Career Services, a faculty member or as a result of an internship or co-op assignment); 19.3% through family or friends; 17.2% from a classified ad; and 1.6% through an employment agency. 7.2% did not provide this information.

SALARY STATISTICS

- The average starting salary for baccalaureate degree graduates securing a **NEW** position was \$22,943, a 1% increase over the average starting salary of \$22,695 in 1995.
- Associate degree recipients averaged \$22,518, down 4.3% from last year's average of \$23,530.

CAREER SERVICES & PLACEMENT USAGE

- 67% of the bachelor's degree recipients have utilized the Career Services Office at some time during their tenure at USI. Usage is highest among students from the School of Business (90%), followed by the School of Science and Engineering Technology (75%), the School of Liberal Arts (72%), and the School of Education and Human Services (63%).
- 38% of Master's degree candidates and 34% of associate degree recipients utilize Career Services programs.
- 15% of bachelor's degree recipients have participated in internships or cooperative education through the Career Services Office. Graduates from the School of Business (26%) and the School of Liberal Arts (24%) are most likely to take advantage of these opportunities. This is in addition to the clinical experiences in the School of Education and Human Services and the School of Nursing and Health Professions which are administered by the academic units and are not reflected in this total.
