

Class of 1997

THE CLASS OF 1997

PROFILE FROM THE OFFICE OF THE REGISTRAR

The Office of the Registrar reports the following salient findings regarding the Class of 1997. Awareness of this demographic information may provide a useful background for other data contained in this report.

- 946 degrees and certificates were awarded to 928 individuals between December 1996 and August 1997.
- Baccalaureate degrees were awarded to 690 graduates of which 543 were bachelor of science degrees, 66 were bachelor of arts, 29 were bachelor of social work, 51 were bachelor of science in nursing and 1 received a bachelor's degree in occupational and general studies.
- 25.4% of the graduates were 30 years of age or older.
- 96.1% of the graduates identified themselves as white, non-Hispanic ethnic origin. 2.8% of the graduates classified themselves as minorities and .7% as non-resident aliens.
- Almost 7 of every 10 graduates (67.1%) were female.
- 58.7% of the degrees were received by graduates from Gibson, Posey, Vanderburgh and Warrick Counties (down 4% from 1996). 18.3% of degree recipients were from other area counties. Graduates from all other Indiana counties represented 11.8% of the graduating class; 10.3% of the degree recipients were from other states; .75% were from other countries.
- The School of Nursing and Health Professions awarded two-thirds (67.5%) of the associate degrees and the School of Business awarded a fifth (19.8%).
- 33.6% of the baccalaureate degrees were awarded by the School of Liberal Arts, followed by the School of Business (22.3%), the School of Education and Human Services (20.7%), the School of Nursing and Health Professions (14.8%), and the School of Science and Engineering Technology (8.6%).

EXECUTIVE SUMMARY

This report is a six-month follow-up of the 1997 graduating class; responses were received from 70% of the graduates.

EMPLOYMENT RATES

- 90.8% of the respondents are actually in the job market. Of the remaining 9.2%, 10 persons are unemployed by choice. The remainder are either unemployed or are pursuing additional degrees.
- Of the graduates in the job market, 71.5% have secured new positions as a result of their degree; 24.4% are employed in the same position that they held prior to graduation.
- Among bachelor's degree recipients who are in the job market (employed or seeking employment), 86.5% are employed "in their field" (up from 85.7% in 1996). Among ALL graduates, 89% of those in the job market are employed in their field of study. (Education majors employed as substitute teachers are included in the category of working "in the field".)
- Among bachelor's degree recipients, technical majors report the highest degree of related employment, including Engineering Technology (100%), Computer Information Systems (100%), and Health Professions (95%). This is consistent with national trends indicating higher-than-average job growth in the computer and health care fields.
- 6.9% of all graduates are underemployed (i.e. working in a field unrelated to their career goals.) This figure is 3.8% less than that reported one year ago.
- 4.6% of bachelor's degree recipients are unemployed and looking for work, .2% more than reported in 1996. The unemployment rate has decreased among associate's degree recipients from 8.4% in 1996 to 1.3% in 1997.

CONTINUED EDUCATION

- 10% of the bachelor's degree recipients who completed the questionnaire were attending graduate school within a year of graduation, up .4% from 1996.
- 36.8% of the associate's degree recipients are currently completing requirements for a baccalaureate degree.
- 7.2% of the bachelor's degree recipients are enrolled in additional undergraduate classes, considerably more than the 4.8% reported in 1996.

GEOGRAPHICAL LOCATION

- 78.3% of the graduates accepted employment in the tri-state, down from 82.7 in 1996 and 85.8% in 1995. Bachelor's degree recipients were most likely to relocate (25.1%), followed by Associate's degree recipients (13.8%) and those receiving Master's degrees (8%).
- 9.7% of the graduates left the tri-state to accept employment elsewhere in Indiana, bringing the total number of 1997 graduates who remained in Indiana to 88%.

JOB SEARCH STRATEGIES

- 28.1% of all working graduates report that they remained employed with the same firm they were working for prior to graduation (master's degree recipients = 50%; bachelor's degree recipients = 25%; associate degree recipients = 27%).
- Of the remaining 71.9%, 29.1% secured positions through direct application to the employer; 23.2% through the University (including Career Services, a faculty member or as a result of an internship or co-op assignment); 23.2% through family or friends; 13.8% from a classified ad; and 2.1% through an employment agency. 4% did not provide this information.

SALARY STATISTICS

- The average starting salary for baccalaureate degree graduates securing a **NEW** position was \$24,771, an 8% increase over the average starting salary of \$22,943 in 1996.
- Associate degree recipients averaged \$22,773, up 1% from last year's average of \$22,518.

CAREER SERVICES & PLACEMENT USAGE

- 63.7% of the bachelor's degree recipients have utilized the Career Services Office at some time during their tenure at USI. Usage is highest among students from the School of Education and Human Services (74.7%), followed by the School of Business (74.4%), the School of Liberal Arts (71.1%), and the School of Science and Engineering Technology (47.8%).
- 24% of Master's degree candidates and 39% of associate degree recipients utilize Career Services programs.
- 14.1% of bachelor's degree recipients have participated in internships or cooperative education through the Career Services Office. Graduates from the School of Business (24%) and the School of Liberal Arts (21.1%) are most likely to take advantage of these opportunities. This is in addition to the clinical experiences in the School of Education and Human Services and the School of Nursing and Health Professions which are administered by the academic units and are not reflected in this total.
