# THE CLASS OF 1998

## PROFILE FROM THE OFFICE OF THE REGISTRAR

The Office of the Registrar reports the following salient findings regarding the Class of 1998. Awareness of this demographic information may provide a useful background for other data contained in this report.

This report is a six-month follow-up of the 1997-98 graduating class; responses were received from 70.7% of the graduates.

- 1007 degrees and certificates were awarded to 988 individuals between December 1997 and August 1998.
- Baccalaureate degrees were awarded to 706 graduates, of whom 554 were Bachelor of Science degrees, 66 were Bachelor of Arts, 34 were Bachelor of Social Work, and 36 were Bachelor of Science in Nursing.
- 31.9% of the graduates were 30 years of age or older.
- 95.4% of the graduates identified themselves as white, non-Hispanic ethnic origin. 3.95% of the graduates classified themselves as minorities and .7% as non-resident aliens.
- Almost 7 of every 10 graduates (68.4%) were female.
- 58.1% of the degrees were received by graduates from Gibson, Posey, Vanderburgh and Warrick Counties. 16.6% of degree recipients were from other area counties. Graduates from all other Indiana counties represented 11.6% of the graduating class; 13% of the degree recipients were from other states; .71% were from other countries.
- 33.1% of the baccalaureate degrees were awarded by the School of Liberal Arts, followed by the School of Business (24.4%), the School of Education and Human Services (20.1%), the School of Nursing and Health Professions (13.2%) and the School of Science and Engineering Technology (9.2%).

## EXECUTIVE SUMMARY / FOLLOW-UP SURVEY

This report is a six-month follow-up of the 1997-98 graduating class; responses were received from 70.7% of the graduates.

### EMPLOYMENT RATES

- 91.3% of the respondents are actually in the job market (i.e. employed, or actively seeking employment). Of the remaining 8.7%, 19 persons (2.7%) are unemployed by choice. The remainder are pursuing additional degrees.
- Of the graduates who are employed, 73.6% have secured new positions as a result of their degree; 26.4% are employed in the same position that they held prior to graduation.

- Among bachelor's degree recipients who are in the job market, 90.5% are employed "in their field" (up from 86.5% in 1997). Among ALL graduates, 92.3% of those in the job market are employed in their field of study. (Education majors employed as substitute teachers are included in the category of working "in the field".)
- 5% of all graduates are underemployed (i.e. working in a field unrelated to their career goals.) This figure is nearly 2% less than that reported one year ago.
- 2.4% of bachelor's degree recipients are unemployed and looking for work, 2.2% less than reported in 1997. Only 1 Master's degree recipient (surveys returned = 88) was unemployed. 5 of the 111 associate degree recipients who returned surveys reported unemployment.

### CONTINUED EDUCATION

- 12% of the bachelor's degree recipients who completed the questionnaire were attending graduate school within a year of graduation, up 2% from 1997.
- 42.3% of the associate's degree recipients are currently completing requirements for a baccalaureate degree, up from 36.8% one year ago.
- 5.4% of the bachelor's degree recipients are enrolled in additional undergraduate classes, considerably less than the 7.2% reported in 1997. Improved job opportunities for college graduates undoubtedly has contributed to this decrease.

### GEOGRAPHICAL LOCATION

- 80.5% of the graduates accepted employment within a 60-mile radius of the University, up from 78.3% in 1997 but less than the 82.7% in 1996. (48 of these individuals resided in Kentucky or Illinois.) Bachelor's degree recipients were most likely to relocate (23%), followed by Associate degree recipients (12.6%) and those receiving Master's degrees (8%).
- 12.2% of the graduates left the tri-state to accept employment elsewhere in Indiana. This brings the total number of 1998 graduates who live and work in Indiana to 85.8%.

### SALARY STATISTICS

- The average starting salary for baccalaureate degree graduates securing a **NEW** position was \$26,005, a 5% increase over the average starting salary of \$24,771 in 1997.
- Associate degree recipients averaged \$20,500, down 10% from last year's average of \$22,773. Though initially alarming, a decrease in graduates from some programs (no associate degrees were awarded in engineering technology in 1997-98) and a sharp increase in participation in other programs can best explain this statistic. The number of graduates receiving an associate degree in Early Childhood Education tripled from 1997 to 1998. Average salaries for these latter graduates are considerably lower than those awarded to associate degree recipients in more technical fields.

**SALARY STATISTICS FOR 1998 BY ACADEMIC MAJOR**

**NEW POSITIONS ONLY**
