THE CLASS OF 1999

PROFILE FROM THE OFFICE OF THE REGISTRAR

The Office of the Registrar reports the following salient findings regarding the Class of 1999. Awareness of this demographic information may provide a useful background for other data contained in this report.

- 1154 degrees and certificates were awarded to 1130 individuals between December 1998 and August 1999.
- Baccalaureate degrees were awarded to 835 graduates, of whom 664 were Bachelor of Science degrees, 107 were Bachelor of Arts, 33 were Bachelor of Social Work, 47 were Bachelor of Science in Nursing and 4 were Bachelor of General Studies.
- 95.3% of the graduates identified themselves as white, non-Hispanic ethnic origin. 3.98% of the graduates classified themselves as minorities and .71% as non-resident aliens.
- 7 of every 10 graduates (70.4%) were female.
- 57% of the degrees were received by graduates whose county of origin was Gibson, Posey, Vanderburgh or Warrick Counties. 15.5% of degree recipients were from other area counties.
 Graduates from all other counties represented 15.4% of the graduating class; 11.4% of the degree recipients were from other states; .71% were from other countries.
- 34.1% of the baccalaureate degrees were awarded by the School of Liberal Arts, followed by the School of Business (26.4%), the School of Education and Human Services (18.6%), the School of Nursing and Health Professions (13.5%) and the School of Science and Engineering Technology (7.4%).

EXECUTIVE SUMMARY / FOLLOW-UP SURVEY

This report is a six-month follow-up of the 1998-99 graduating class; responses were received from 73.2% of the graduates.

EMPLOYMENT RATES

- 94.5% of the respondents are actually in the job market (i.e. employed, or actively seeking employment). The remaining 45 persons have chosen not to seek employment at this time.
- Of the graduates who are employed, 75.3% have secured new positions as a result of their degree; 24.7% are employed in the same position that they held prior to graduation.
- Among bachelor's degree recipients who are in the job market, 90.2% are employed "in their field". (This is the second consecutive year that this number has exceeded 90%.) Among ALL

graduates, 91.7% of those in the job market are employed in their field of study. (Education majors employed as substitute teachers are included in the category of working "in the field".)

Although the number of <u>underemployed</u> graduates (i.e. working in a field unrelated to their career goals) is slightly higher than in 1998 (6%, as opposed to 5% one year ago), the number of <u>unemployed</u> graduates (not working but seeking employment) has decreased by .1% to 2.3%.

CONTINUED EDUCATION

- 9.3% of the bachelor's degree recipients who completed the questionnaire were attending graduate school within a year of graduation, down almost 3% from 1998. This is not an unanticipated figure in such a robust job market.
- 46.5% of the associate's degree recipients are currently completing requirements for a baccalaureate degree, up from 42.3% one year ago.
- 5.1% of the bachelor's degree recipients are enrolled in additional undergraduate classes, a number virtually unchanged from one year ago (5%).

GEOGRAPHICAL LOCATION

80.2% of the graduates accepted employment within a 60-mile radius of the University, only
.3% less than in 1998 (51 of these individuals reside in Kentucky or Illinois.) Master's degree
recipients were most likely to relocate (20.7%), followed by Bachelor's degree recipients
(20.5%) and those receiving Associate degrees (18.4%).

These figures represent an interesting departure from past relocation profiles. In 1998, only 8% of Master's degree candidates and 12.6% of Associate degree candidates relocated. In past years, graduates with a 4-year degree were the most likely to relocate. The percentage of Bachelor's degree recipients who left the tri-state in 1999 actually declined from 23% to 20.5%.

 9.8% of the graduates left the tri-state to accept employment elsewhere in Indiana, bringing the total number of 1999 graduates who live and work in Indiana to 90%.

SALARY STATISTICS

- The average starting salary for baccalaureate degree graduates securing NEW, FULL-TIME positions was \$26,007, virtually identical to the average starting salary of \$26,005 in 1998.
- Associate degree recipients, on the other hand, averaged \$26,269, up 28% from last year's average of \$20,500. This more than compensates for the 10% decrease from 1997 to 1998. Again, the wide swings in average salaries for this population is influenced by the number of graduates in the various associate degree programs. In 1999, there was an increase in the number (and percentage) of degree recipients from technically-based programs, such as CIS, Engineering Technology, and Health Professions. Hence, average salaries among associate degree recipients increased. In a year such as 1998, when there was a larger number of graduates from non-technical degree programs such as Early Childhood Education (9 in 1999; 28 in 1998), average salaries will almost certainly be affected.
