THE CLASS OF 2000

PROFILE FROM THE OFFICE OF THE REGISTRAR

The Office of the Registrar reports the following salient findings regarding the Class of 2000. Awareness of this demographic information may provide a useful background for other data contained in this report.

- 1221 degrees and certificates were awarded to 1196 individuals between December 1999 and August 2000.
- Baccalaureate degrees were awarded to 902 graduates, of whom 709 were Bachelor of Science degrees, 91 were Bachelor of Arts, 31 were Bachelor of Social Work, and 71 were Bachelor of Science in Nursing.
- 95.7% of the graduates identified themselves as white, non-Hispanic ethnic origin. 3.2% of the graduates classified themselves as minorities and 1.1% as non-resident aliens.
- 64.9% of the graduates were female, down from 70.4% in 1999.
- 53.6% of the degrees were received by graduates whose county of origin was Gibson, Posey, Vanderburgh or Warrick Counties. 13.2% of degree recipients were from other area counties. Graduates from all other counties in Indiana represented 22.7% of the graduating class; 9.4% of the degree recipients were from other states; 1.1% were from other countries.
- 30% of the baccalaureate degrees were awarded by the School of Liberal Arts, followed by the School of Business (24.5%), the School of Education and Human Services (19.2%), the School of Nursing and Health Professions (17.1%) and the School of Science and Engineering Technology (9.2%).

EXECUTIVE SUMMARY / FOLLOW-UP SURVEY

This report is a six-month follow-up of the 1999-2000 graduating class; responses were received from 62% of the graduates.

EMPLOYMENT RATES

- 91% of the respondents are actually in the job market (i.e. employed, or actively seeking employment). The remaining 9% are either enrolled full-time in additional academic coursework or have chosen not to seek employment at this time.
- The graph on page 3 of this report indicates that 11.3% of the bachelor's degree recipients are enrolled in graduate or professional school. This number plus the 91% in the job market will exceed 100% because many new graduates are employed while pursuing graduate school coursework on a part-time basis.

- Of the graduates who are employed, 76% have secured new positions as a result of their recent degree completion; 24% are employed in the same position that they held prior to graduation.
- Among bachelor's degree recipients who are in the job market, 91.3% are employed "in their field". Among ALL graduates, 92.8% of those in the job market are employed in their field of study. (Education majors employed as substitute teachers are coded as working "in their field".)
- The number of <u>underemployed</u> graduates (i.e. working in a field unrelated to their career goals) stands at 4.6%, having decreased from 6% one year ago. The number of <u>unemployed</u> graduates (not working but seeking employment) has increased by .3% to 2.6%.

CONTINUED EDUCATION

- 11.3% of the bachelor's degree recipients who completed the questionnaire were attending graduate school within a year of graduation, up 2% from 1999, but still below the 12% reported in 1998.
- 51.9% of the associate's degree recipients are currently completing requirements for a baccalaureate degree, up 5.4% from 1999 and almost a 10% increase (9.6%) from 1998.
- 5.4% of the bachelor's degree recipients are enrolled in additional undergraduate coursework, a number virtually unchanged from one year ago (5.1%).

GEOGRAPHICAL LOCATION

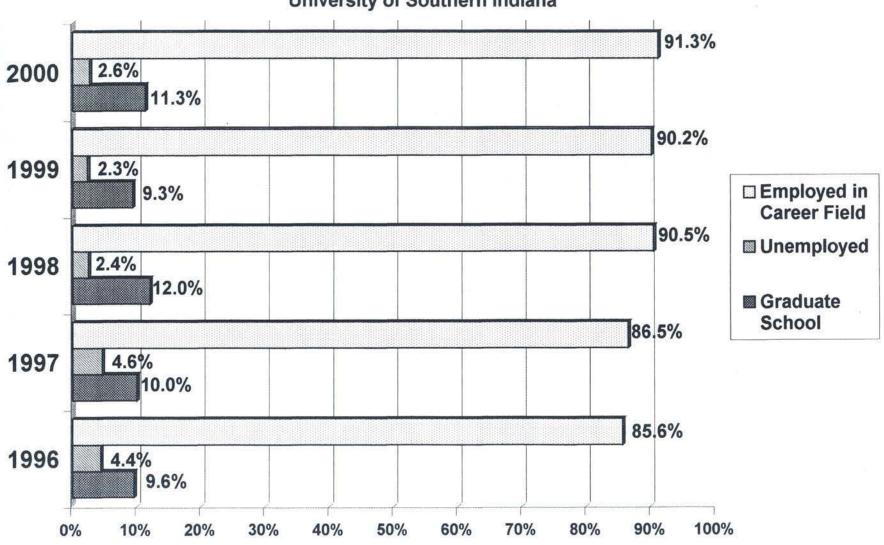

- 74.8% of the graduates accepted employment within a 60-mile radius of the University, a drop of 5.4% from 1999. (34 of these individuals reside in Kentucky or Illinois.) 29.4% of the bachelor's degree recipients left the tri-state area, up sharply from the 20.5% who relocated in 1999. Among master's and associate degree recipients, relocation actually decreased. 13.4% of master's degree recipients relocated, compared to 20.7% in 1999. Among associate degree recipients, the 2000 figure was 13.5% (1999=18.4%).
- 16% of the graduates left the tri-state to accept employment elsewhere in Indiana, bringing the total number of 2000 graduates who live, work and utilize services in Indiana to 90.8%. Even if the 34 Illinois and Kentucky residents are subtracted from the tri-state figure, the state retention rate for USI graduates of the year 2000 is 86.3%

SALARY STATISTICS

- The average starting salary for baccalaureate degree graduates securing NEW, FULL-TIME positions was \$28,418, a 9.3% increase over the average starting salary of \$26,007 in 1999. Although the increase seems steep, it is not unexpected since the average salary of this group increased only \$2.00 between 1998 and 1999.
- Associate degree recipient salaries remained relatively flat, averaging \$26,339, up \$70 from last year's average of \$26,269.
