THE CLASS OF 2001

PROFILE FROM THE OFFICE OF THE REGISTRAR

The Office of the Registrar reports the following demographic information regarding the Class of 2001. We include it to provide a useful background for other data contained in this report.

- Between December 2000 and August 2001, 1303 degrees and certificates were awarded to 1276 individuals.
- Baccalaureate degrees were awarded to 1002 graduates, of whom 795 were Bachelor of Science degrees, 118 were Bachelor of Arts, 31 were Bachelor of Social Work, and 54 were Bachelor of Science in Nursing. 4 individuals graduated with a Bachelor of General Studies.
- 96.4% of the graduates identified themselves as white, non-Hispanic ethnic origin. 3.1% of the graduates classified themselves as minorities and .55% as non-resident aliens.
- 66.9% of the graduates were female, up from 64.9% in 2000.
- Graduates whose county of origin was Gibson, Posey, Vanderburgh or Warrick received 49.8% of the degrees, while 16.1% of degree recipients were from other area counties. Graduates from all other counties in Indiana represented 22% of the graduating class; 11.6% of the degree recipients were from other states; .5% were from other countries.
- 31.6% of the baccalaureate degrees were awarded by the School of Liberal Arts, followed by the School of Business (28.1%), the School of Education and Human Services (18.8%), the School of Nursing and Health Professions (14.8%) and the School of Science and Engineering Technology (6.5%).

EXECUTIVE SUMMARY / FOLLOW-UP SURVEY

This report is a six-month follow-up of the 2000-2001 graduating class; responses were received from 63.2% of the graduates.

EMPLOYMENT RATES

- 92.7% of the respondents are actually in the job market (i.e. employed, or actively seeking employment). The remaining 7.3% are either enrolled in additional academic coursework or have chosen not to seek employment at this time.
- The graph on page 4 of this report indicates that 15.4% of the bachelor's degree recipients are enrolled in graduate or professional school. This number plus the 93% in the job market will exceed 100% because many new graduates are employed while pursuing graduate school coursework.
- Of the graduates who are employed, 77.1% have secured new positions as a result of their recent degree completion; 22.9% are employed in the same position that they held prior to graduation.

- Among bachelor's degree recipients who are in the job market, 90.7% are employed "in their field", down from 91.3% in 2000. (Education majors employed as substitute teachers are coded as working "in their field".) Among ALL graduates, 92.5% of those in the job market are employed in their field of study (2000 figure = 92.8%). Although events in the latter part of 2001 had a profound impact upon employment opportunities, the job market had already begun to soften the previous spring during the time that most graduates were conducting their job campaigns.
- The number of underemployed graduates (i.e. working in a field unrelated to their career goals) stands at 6%, having increased from 4.6% one year ago. The number of unemployed graduates (not working but seeking employment) has decreased from 2.6% to 1.5%. A less-than-robust job market may have influenced some graduates to accept or retain employment that is not exactly what they desire while continuing to seek positions more in keeping with their career goals.

CONTINUED EDUCATION

- 15.4% of the bachelor's degree recipients who completed the questionnaire were attending graduate school within a year of graduation, up 4.1% from 2000. The soft job market may have convinced some graduates who would otherwise have entered the job market to pursue graduate study instead.
- 46.8% of the associate's degree recipients are currently completing requirements for a baccalaureate degree, down from 51.9% in 2000.
- 6.6% of the bachelor's degree recipients are enrolled in additional undergraduate coursework, an increase of 22% from one year ago (5.4%).

GEOGRAPHICAL LOCATION

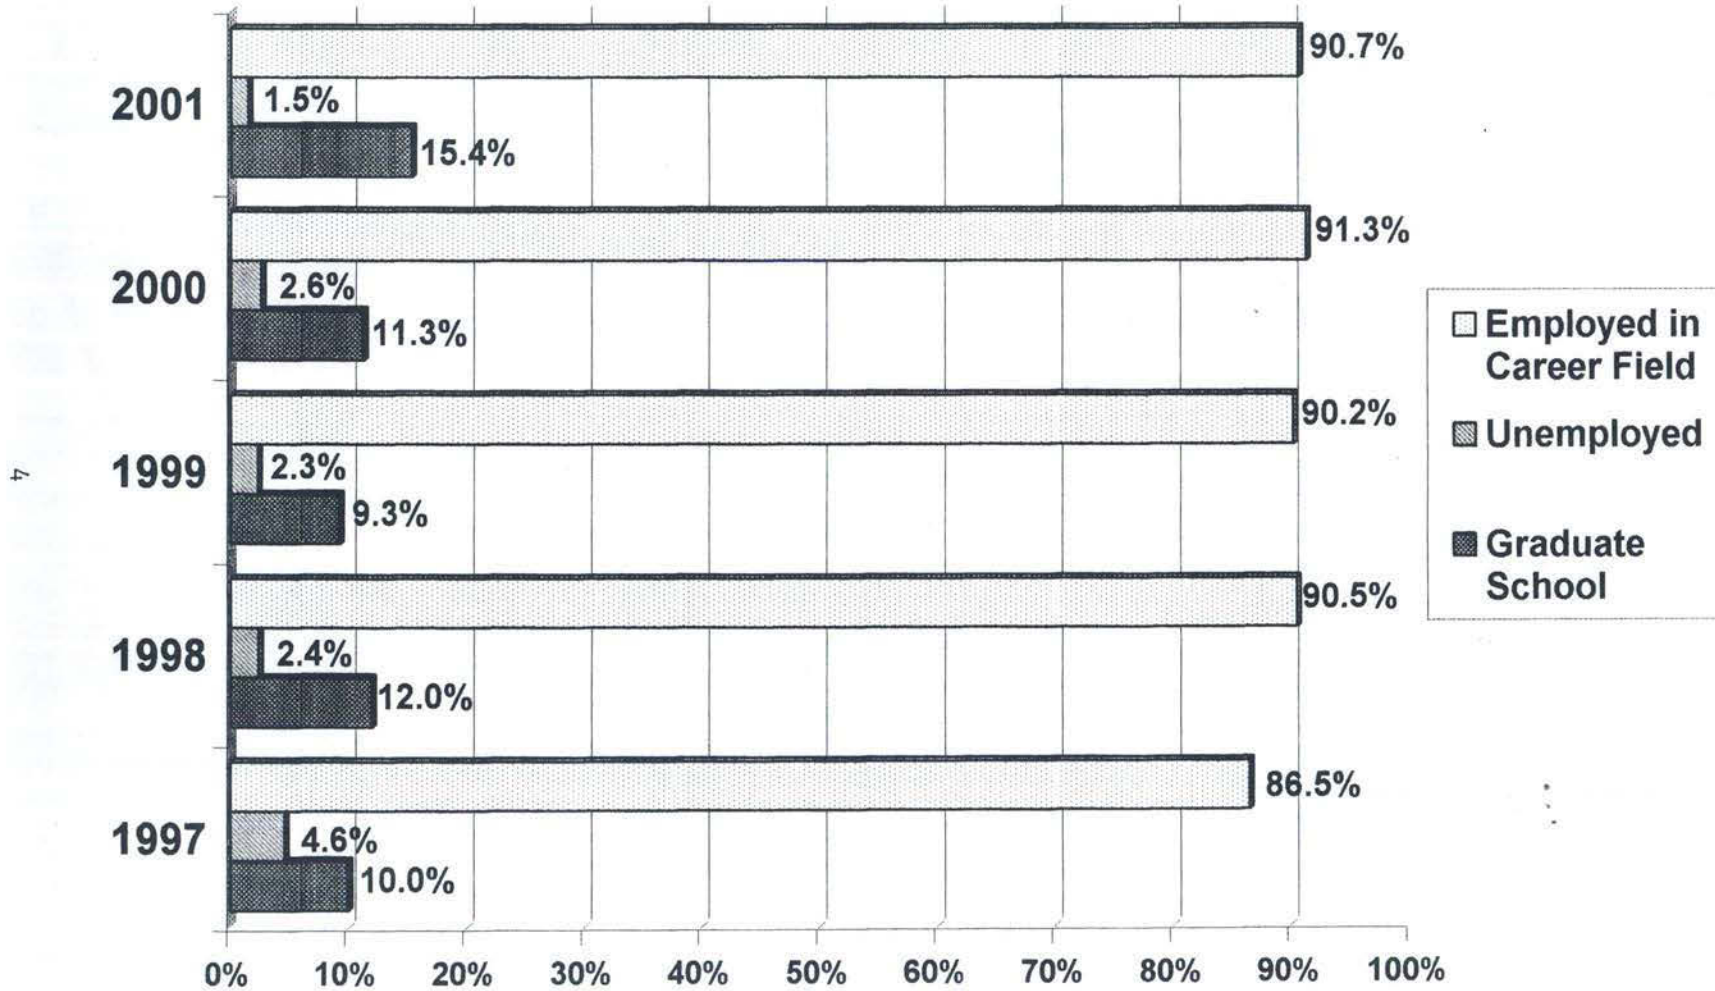

- 72.7% of the graduates accepted employment within a 60-mile radius of the University, a drop of 2.1% from 2000. (44 of these individuals reside in Kentucky or Illinois.) 30.2% of the bachelor's degree recipients left the tri-state area, up slightly from the 29.4% who relocated in 2000. Among master's degree recipients, relocation actually decreased from 13.4% to 10.2%. Associate degree recipients were more mobile; 23.4% relocated, compared to 13.5% in 2000.
- 16.7% of the graduates left the tri-state to accept employment elsewhere in Indiana, bringing the total number of 2001 graduates who live, work and utilize services in Indiana to 89.5%. Even if the 44 Illinois and Kentucky residents are subtracted from the tri-state figure, the state retention rate for 2001 USI graduates is 84%.

SALARY STATISTICS

- The average starting salary for baccalaureate degree graduates securing **NEW, FULL-TIME POSITIONS** was \$28,564, a .5% increase over the average starting salary of \$28,418 in 2000.
- Associate degree salaries (**NEW, FULL-TIME POSITIONS**) increased more substantially, averaging \$30,247, a 14.8% increase over the \$26,339 reported in 2000. Since most associate degree recipients graduate from the School of Nursing and Health Professions (fields in high demand) it is not surprising that, on average, associate degree salaries are higher than those for recipients of 4-year, non-technical degrees.
