THE CLASS OF 2003

PROFILE FROM THE OFFICE OF THE REGISTRAR

The Office of the Registrar reports the following demographic information regarding the Class of 2003. We include it to provide a useful background for other data contained in this report.

- Between December 2002 and August 2003, 1361 degrees and certificates were awarded to 1335 individuals.
- Baccalaureate degrees were awarded to 1027 graduates; 841 Bachelor of Science degrees, 103 Bachelor of Arts, 31 Bachelor of Social Work, 43 Bachelor of Science in Nursing, and 9 Bachelor of General Studies.
- 95.7% of the graduates identified themselves as white, non-Hispanic ethnic origin. 3.2% of the graduates classified themselves as minorities and 1.2% as non-resident aliens.
- 63.1% of the graduates were female, down from 65.8% in 2002.
- Graduates whose county of origin was Gibson, Posey, Vanderburgh or Warrick received 47.5% of the degrees, while 15.1% of degree recipients were from other area counties. Graduates from all other counties in Indiana represented 20.1% of the graduating class; 16.2% of the degree recipients were from other states; 1.2% were from other countries.
- 34.7% of the baccalaureate degrees were awarded by the School of Liberal Arts, followed by the School of Business (23.4%), the School of Education and Human Services (19.9%), the School of Nursing and Health Professions (15.2%), the School of Science and Engineering Technology (6%), and Extended Services (.9%).

EXECUTIVE SUMMARY / FOLLOW-UP SURVEY

This report is a six-month follow-up of the 2002-2003 graduating class; responses were received from 59% of the graduates.

EMPLOYMENT RATES

- 93.5% of the respondents are employed or actively seeking employment. The remaining 6.5% are either enrolled in additional academic coursework or have chosen not to seek employment at this time.
- The graph on page three of this report indicates that 19% of the bachelor's degree recipients are enrolled in graduate or professional school. This number plus the number employed or actively seeking employment will exceed 100% because many new graduates are employed while pursuing graduate school coursework.
- Of the graduates who are employed, 67.2% have secured new positions; 32.8% are employed in the same position that they held prior to graduation.

- Among bachelor degree recipients who are employed, 87.8% are working "in their field", a slight decrease from 88.1% in 2002. (Education majors employed as substitute teachers are coded as working "in their field".) Among ALL graduates employed, 90% are working in their field of study (2002 figure = 89.8%). Overall, these numbers have not changed significantly in the past two years.
- Among all bachelor degree recipients, the number of underemployed (i.e. working in a field unrelated to their career goals) stands at 10.5%. Among bachelor degree recipients who are employed, the total number of underemployed bachelor graduates stands at 11.9%.
- There were 31(5.4%) bachelor graduates unemployed (not working and not attending additional coursework or graduate school but seeking employment). *A less-than-robust job market has made it more difficult for graduates to obtain employment even outside their career field.*

CONTINUED EDUCATION

- 19% of the bachelor's degree recipients who completed the questionnaire were attending graduate school within a year of graduation, up 18.1% from 2002.
- 37.9% of the associate's degree recipients are currently completing requirements for a baccalaureate degree, down from 45.2% in 2002.
- 2.5% of the bachelor's degree recipients are enrolled in additional undergraduate coursework, a decrease of .2% from one year ago (2.7%).

GEOGRAPHICAL LOCATION

- 74% of the graduates accepted employment within a 60-mile radius of the University, a 4.3% decrease from 2002. (39 of these individuals reside in Kentucky or Illinois.). 26.2% of the employed bachelor's degree recipients left the tri-state area, up slightly from the 25.3% who relocated in 2002. Employed 2003 master degree recipients were more mobile; 23.9% relocated, compared to only 6% in 2002. Among employed associate degree recipients, relocation stayed relatively consistent from 18.6% to 18.8%.
- 11.5% of the graduates left the tri-state to accept employment elsewhere in Indiana, bringing the total number of 2003 graduates who work and utilize services in Indiana to 85.5%. Even if the 39 Illinois and Kentucky residents are subtracted from the tri-state figure, the state retention rate for 2003 USI graduates is 80.1%.

SALARY STATISTICS

- The average starting salary for baccalaureate degree graduates securing **NEW, FULL-TIME POSITIONS** was \$29,657, a 3% increase over the average starting salary of \$28,790 in 2002.
- Associate degree salaries (**NEW, FULL-TIME POSITIONS**) increased more substantially, averaging \$31,833, a .8% increase over the \$31,593 reported in 2002. Since most associate degree recipients graduate from the School of Nursing and Health Professions (fields in high demand) it is not surprising that, on average, associate degree salaries are higher than those for recipients of 4-year, non-technical degrees.
