

## Core Chiropractic

Core Chiropractic is a state of the art chiropractic health clinic that specializes in neurologically based care for the entire family. We utilize NASA certified equipment and the most advanced technique in the history of chiropractic to assess your nervous system and see how it is functioning. Grey's anatomy states that the nervous system controls and coordinates every other system in the body, thus if our nervous system is not functioning properly then we cannot be 100% healthy.

Core presents a fun, yet educational, environment for externs to learn and develop new skills in patient interaction and health. This externship will present a lot of opportunity for individuals to actually work with patients and utilize their own knowledge.

Objectives of externs:

Observe Doctor

Learning and working on mobility of patients Learning and work on strength and flexibility of patients

Learning and administering kinesio taping/stability taping Scanning patients with technology
