

Doctor of Nursing

BSN to DNP

Offered by the College of Nursing and Health Professions at USI, the 100% Online Doctor of Nursing Practice (DNP) - BSN to DNP program is committed to quality nursing education and responsiveness to regional and national healthcare needs. This practice-focused doctorate will prepare you for multiple roles to make contributions to healthcare and nursing through scholarly practice, healthcare leadership, and nursing education.

The curriculum consists of a four-year (full-time) or five-year (part-time) plan of study for doctoral level coursework and includes the completion of an evidence-based DNP project.

The program includes online synchronous seminar sessions one to two days a semester. The majority of clinical hours will be completed during the final year of the program.

100% ONLINE

Concentrations

- Adult Geriatric Nurse Practitioner, Acute
- Family Nurse Practitioner
- Psychiatric Mental Health Nurse Practitioner
- Adult Gerontologic Clinical Nurse Specialist

Program Outcomes

Upon completion of the Doctor of Nursing Practice program, you will be able to:

- Integrate nursing science with knowledge from ethics and the biophysical, psychosocial, analytical, educational, and organizational sciences as the basis for the highest level of nursing practice.
- Develop and evaluate care delivery approaches that meet current and future needs of patient populations based upon scientific findings in nursing science, clinical sciences, and organizational, political, and economic sciences.
- Use analytic methods to appraise existing literature and other evidence to determine and implement the best evidence for practice.
- Serve as a leader in the development and implementation of institutional, local, state, federal, and international health policy.
- Advocate for the patients and the nursing profession within government, business, education, and healthcare communities.
- Collaborate with interprofessional teams to analyze complex practice and organizational issues in leading change to improve patient, population, and system health outcomes.
- Analyze epidemiological, bio-statistical, environmental, and other scientific data related to individual, aggregate, and population health.
- Integrate advanced level of judgment, systems thinking, and accountability in designing, teaching, delivering, and evaluating evidence-based care to improve patient and healthcare outcomes.

Admission Requirements

- A baccalaureate degree in nursing (BSN) from a nationally-accredited nursing program and a regionally-accredited college or university earned prior to applying to the BSN to DNP program.
- ALL APPLICANTS MUST HAVE a minimum cumulative baccalaureate grade point average (GPA) of 3.00 on a 4.00 scale. GPAs are reviewed based upon the total BSN GPA. This includes transfer courses in RN Completion programs.
- Satisfactory completion of a course in undergraduate statistics (grade C or better) at the time of application.
- An unencumbered US RN license in all states of practice.
- Complete application file.
- Non-native speakers of English must meet English proficiency requirements as established by the USI Center for International Programs.
