Nurse Practitioner Residency Program

VOL.3, ISSUE 1

The purpose of this newsletter is to keep stakeholders updated on progress and accomplishments of the Advanced Nurse Education – Nurse Practitioner Residency (ANE-NPR) Program.

In 2019, the University of Southern Indiana (USI) was awarded a four-year \$1.7 million federal HRSA grant to develop this 12-month residency program for nurse practitioner (NP) graduates in primary care settings serving rural and underserved populations in southwestern Indiana.

USI is collaborating with community-based health clinics to provide these unique experiences:

- **Southwestern Behavioral Healthcare**
- **Southern Indiana Community Health Center**
- **Samaritan Center**
- **ECHO Community Health Care**

The residents focus will be both clinical and academic enhancements that will assist in the transition from academia to practice and prepare them as primary care providers. The residency program includes precepted clinical practice, specialty rotations, mentoring sessions and enhanced didactic education.

2022-2023 Nurse Practitioner Residents

- Management of the Suicidal Patient
- Integration of Behavioral Health in Primary Care

DR. JAMES MACKE

Southwestern Behavioral Health Care - *Stepping Stone*

- Prescribing Controlled Substances: A Reflection of Your Practice

ALAN SWARTZ, FNP

ECHO Community Health Care

- Lyme Disease

VALERIE TURPEN, NP

Deaconess Health System

- Geriatrics Pt. 1

HOT DIDACTIC TOPICS, *CONTINUED*

DR. LORI PHILLIPS
University of Southern Indiana

- ANA Ethics
- Community Needs assessment
- Meaningful Use
- Health Information Exchange/ Role Transition
- Writing Prescriptions

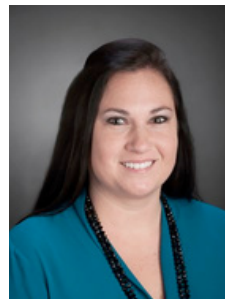

DR. GREGORY UNFRIED
Southwestern Behavioral Health Care

- Schizophrenia Spectrum and Disorders

DR. KATHY RIEDFORD
University of Southern Indiana

- Triage and Crisis Management

JULIE MORGAN
Deaconess

- Management of Common Respiratory Problems

BONNIE RINKS
University of Southern Indiana

- Motivational Interviewing

OLIVIA TAYLOR, PMHNP
Memorial Hospital and Health Care Center

- Alzheimer's and Dementia

KELLIE JARBOE, NP
Evansville Christian Health Clinic

- STI's
- Workshop on exam and test collections

KIM BURK, AGACNP
Deaconess

- Neurological Issues

SHELIA SANTACANA, NP
Deaconess

- Endocrinology

UNIQUE OPPORTUNITIES

SPECIALTY CLINICS

Each resident spends time in multiple specialty areas. Working in rural and underserved areas, primary care providers will often be the first to see these patients. Specialists offer expert insight for the residents into their specialty areas, valuable clinical pearls, referral considerations, and allows time for wonderful networking opportunities.

Areas the residents have spent time in these first months include:

- Endocrinology
- Holly's House
- Aurora
- Drug Treatment Court
- OB/GYN
- Pulmonary
- Stepping Stone
- Cardiovascular
- Podiatry
- Orthopedic
- EPD Ride Along
- Injection Clinic
- Mental Health Court
- Daviess Co. Partnership Connections
- Daviess Co. Health Dept.
- Evansville State Hospital
- Hope's Voice Domestic Violence Treatment Center
- Knox Co. Family Recovery Court
- Generations

COVID 19 MODULES

The residents spend time with the most recent updates regarding COVID 19 from the CDC. These are available through the CDC's Clinical Outreach and Communication Activity (COCA). Each week the CDC offers COCA updates regarding COVID 19.

Activities residents have participated in include:

- Post COVID 19 Conditions
- The Role of Telehealth in Expanding Access to Healthcare During the COVID-19
- Pandemic: Considerations for Vaccine Uptake and Monitoring for Adverse Events
- Evaluating and Supporting Patients Presenting with Fatigue Following Covid-19
- Pediatric COVID-19 Vaccines: CDC's Recommendations for Pfizer-BioNTech COVID-19 Vaccine Primary Series in Children 5-11 Years Old
- What Clinicians Need to Know about the Recent Updates to CDC's Recommendations for COVID-19 Boosters

Mackenzie attended the MAIA conference in August 2022; keynote speakers were **Gregory Jicha, MD, PhD**, a Professor of Neurology with University of Kentucky HealthCare. He is board certified by the American Board of Psychiatry and Neurology and presented on *Normal Brain Aging*.

Erin Ramsey, MPA, has worked in the non-profit sector for 30 years and has a degree in child development and psychology from California State University. Erin presented *Rest and Rejuvenate: Paving a Positive Path Forward*. Erin owns a farm to provide a place of inspiration and rejuvenation for the well-being of others.

Pauline Boss, PhD, shared her stress-based approach to find meaning and new hope through her presentation, *Caregiving Through Uncertain Times: Finding Meaning and New Hope in Ambiguous Loss*. Boss has studied ambiguous loss since the 1970's, giving families guidance through care giving.

John Omura, MD, MPH, and Laura Whalen, MPH, presented *Risk Reduction Strategies for Brain Health*. Omura is the Medical Officer on the Alzheimers Disease Team for the CDC. He actively participates in national initiatives to implement public health approaches to addressing brain health, Alzheimer's disease and related dementias and healthy aging. Whalen is an epidemiologist and a Public Health Advisor for the CDC. She coordinates support to state, local and tribal public health departments in implementing public health approaches to addressing brain health, including Alzheimer's disease and other dementias, and elevating early detection and diagnosis of dementia as a public health priority

This program is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of an award totaling \$396,091.00 with 0 percent financed with non-governmental sources.
